Professional Summary

Full Stack Developer with hands-on experience building web applications using React.js, Java, Spring Boot, Python FastAPI, RESTful APIs, and MySQL, with additional experience developing Agentic AI applications using LangGraph, LangChain, and LLMs.

Education

- B.Tech in Computer Science and Engineering – KL University, Andhra Pradesh – 85.3%** 2023 – 2027
- Intermediate – BIEAP – Sri Sai Gayatri Junior College – 83%** 2021 – 2023
- Class 10 – CBSE – Centurion Public School, Odisha – 61%** 2020 – 2021

Experience

Data Analyst Intern, Trizula Digital Solutions (TDS) Jun 2025 – Jul 2025

- Worked on **Invoice.AI**, a full-stack invoice processing application using React.js and Spring Boot.
- Developed and integrated **RESTful APIs** for invoice management, frontend-backend communication, and data processing.
- Implemented **OCR-based invoice extraction**, converting unstructured invoice data into structured datasets with validation.
- Contributed to **AITECH.STUDIO** using reusable React components, debugging, testing, Git/GitHub, and Agile practices.

Projects

Farmer–Dealer Marketplace Platform | Java, Spring Boot, React.js, MySQL, Docker, GitHub Oct 2025 – Dec 2025

- Developed a full-stack marketplace using **React.js, Java, Spring Boot, MySQL, and RESTful APIs**.
- Built APIs for product management, bidding, authentication, user management, and frontend-backend integration.
- Implemented **JWT authentication, role-based access control, validation, and exception handling**.
- Integrated MySQL using **Spring Data JPA/Hibernate** and used Docker, Git/GitHub, OOP, debugging, and testing.

AI-Powered Medical CRM with Agentic AI | React.js, FastAPI, LangGraph, MySQL May 2026 – Jun 2026

- Developed an AI-powered CRM enabling medical representatives to record HCP interactions using natural language text or voice.
- Built an **Agentic AI workflow** with LangGraph and LangChain to extract doctors, products, sentiment, and structured entities.
- Implemented context-aware **Smart Editing** to update MySQL records through natural language commands using FastAPI.
- Built a React.js, Vite, and Redux Toolkit frontend with real-time state synchronization and integrated **Groq LLaMA 3 70B** for LLM inference.

Technical Skills

Programming	: Java, Python, JavaScript, TypeScript, SQL, C
Frontend	: React.js, Vite, Redux Toolkit, HTML5, CSS3
Backend	: Spring Boot, Python FastAPI, REST APIs, Microservices
AI / GenAI	: LangGraph, LangChain, Agentic AI, LLMs, Groq API
Databases	: MySQL, PostgreSQL
Cloud / DevOps	: Azure, Docker, Jenkins, Kubernetes
Tools	: Git, GitHub, VS Code, Spring Tool Suite, Postman
Core CS	: OOP, SDLC, Authentication, API Integration, Debugging, Testing, Problem Solving

Certifications

- Microsoft Azure Fundamentals (AZ-900) | GitHub Foundations | Machine Learning Certification – Internshala Trainings

Achievements

Deloitte Data Analyst Job Simulation – Deloitte May 2026

IoT Expo – KL University – Arduino UNO Game Development Jan 2024

AI-Powered Learning Platform Development – KL University Dec 2023
