Career Objective

Aspiring Full Stack Developer with hands-on experience in building scalable web applications using React.js, Java, Spring Boot, Nodejs, REST APIs, and MySQL. Skilled in frontend-backend integration, authentication, database management, and application deployment using Docker and Azure. Understanding of Agile development, SDLC, debugging, testing, and problem-solving with a passion for developing production-ready applications.

Education

- **B.Tech in Computer Science and Engineering – KL University, Andhra Pradesh – 85.3%** 2023 – 2027
- **Intermediate – BIEAP – Sri Sai Gayatri Junior College, Andhra Pradesh – 83%** 2021 – 2023
- **Class 10 – CBSE – Centurion Public School, Odisha – 61%** 2020 – 2021

Experience

- **Data Analyst Intern, Trizula Digital Solutions (TDS)** Jun 2025 – Jul 2025
 - Worked on **Invoice.AI**, a full-stack invoice processing platform using React.js and Spring Boot.
 - Developed and integrated REST APIs for invoice management, frontend-backend communication, and backend workflows.
 - Implemented OCR-based invoice data extraction and transformed unstructured invoice data into structured datasets.
 - Applied data validation, debugging, testing, and troubleshooting techniques to improve application reliability and performance.
 - Contributed to **AITECH.STUDIO**, a React-based AI learning platform focused on scalable web application development.
 - Collaborated in an Agile development environment to enhance application features and backend services.

Projects

- **Farmer–Dealer Marketplace Platform** | Java, Spring Boot, React.js, MySQL, Docker, GitHub Oct 2025 – Dec 2025
 - Developed a responsive full-stack marketplace platform which connects using React.js, Spring Boot, and MySQL for seamless farmer-dealer interactions.
 - Designed and integrated RESTful APIs for product listing, bidding, authentication, user management, and frontend-backend communication.
 - Implemented JWT-based authentication, role-based access control, validation, and error handling for secure application access.
 - Built reusable frontend components and optimized usability through responsive and user-friendly interface design.
 - Integrated MySQL using JPA and Hibernate while applying object-oriented programming and modular architecture principles.
 - Used Git/GitHub, Docker, debugging, testing, and Agile development practices to improve deployment, collaboration, and maintainability.
- **IoT Smart Factory Monitoring System** | Python, Azure, Power BI Feb 2026 – Mar 2026
 - Built an IoT-based monitoring system to process and analyze machine data in near real-time using Azure cloud services.
 - Streamed sensor data to Azure IoT Hub using Python for scalable data handling.
 - Processed and stored datasets using Azure Stream Analytics and Cosmos DB.
 - Developed interactive Power BI dashboards to visualize machine performance and operational trends.

Technical Skills

- **Programming Languages:** Java, Python, C, SQL
- **Backend Development:** Spring Boot, REST APIs, Microservices
- **Frontend Development:** React.js, HTML, CSS, JavaScript
- **Databases:** MySQL, PostgreSQL
- **Version Control & Tools:** Git, GitHub, VS Code, Spring Tool Suite
- **Cloud & DevOps:** Azure, Docker, Jenkins, Kubernetes
- **Core Computer Science:** Object-Oriented Programming, Problem Solving, SDLC
- **Data & Visualization:** Power BI, Tableau, Excel

Certifications

- Microsoft Azure Fundamentals
- GitHub Foundations
- Machine Learning Certification – Internshala Trainings

Achievements

- | | |
|--|----------|
| • Deloitte Data Analyst Job Simulation – Deloitte | May 2026 |
| Completed a practical business analytics and data-driven decision-making simulation project. | |
| • IoT Expo – KL University | Jan 2024 |
| Received recognition for leading an Arduino UNO game development project. | |
| • AI-Powered Learning Platform Development – KL University | Dec 2023 |
| Contributed to the development of an AI-powered learning platform using modern web technologies. | |
